

GABRIELA E. MENOCAL COVER

Senior Solutions Engineer | Technical Architect | Cloud, AI & Network Solutions
Ottawa, ON · +1 613-981-1021 · gmenocal89@gmail.com · [linkedin.com/in/gmenocalcover](https://www.linkedin.com/in/gmenocalcover)

PROFESSIONAL SUMMARY

Senior Solutions Engineer and Technical Architect with 15+ years of enterprise pre-sales, cloud, AI, and networking experience across public sector, Fortune 500, healthcare, banking, and education clients. Skilled at translating complex business requirements into solution architectures, executive presentations, customized demos, and high-value Proofs of Concept. AWS Certified Solutions Architect and AWS Certified AI Practitioner, with hands-on experience in Azure, enterprise networking, security, cloud infrastructure, and foundational GCP exposure. Proven record supporting \$500K+ enterprise engagements, RFP/RFI responses, partner enablement, and cross-functional sales strategy.

CORE COMPETENCIES

Solution Architecture · Enterprise Pre-Sales · AWS Cloud · Technical Discovery · Proofs of Concept · RFP/RFI Responses · Executive Presentations · Cloud Networking · Network Security · Partner Enablement · Public Sector Procurement · Customer Success · Multilingual

CAREER HIGHLIGHTS

- Supported enterprise pre-sales engagements valued at \$500K–\$700K+ across public and private sector accounts.
- Led cloud performance validation across AWS, Azure, and Linode, influencing shipped AMI product configurations.
- Built and launched a partner certification program for 45+ individuals across 10+ channel partners.
- Led national fiber expansion, increasing country-level fiber optic capacity by 30%.

CERTIFICATIONS

Government of Canada Security Clearance — Secret (Level II) — Issued by Public Services and Procurement Canada (PSPC) · Granted October 2024 · Valid until October 2034

AWS Certified Solutions Architect – Associate — Valid Nov 2025 – Nov 2028

AWS Certified AI Practitioner — Valid May 2026 - May 2029

Microsoft Azure Fundamentals — Issued Jun 2021 · No expiration

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS (Certified Solutions Architect), Azure, EC2, cloud networking, VPN solutions, generative AI fundamentals, AWS AI/ML service concepts, Amazon Bedrock fundamentals.
- **Networking:** BGP, OSPF, RIP/RIP2, VoIP/SIP, IPRAN, fiber optics, switching/routing, Ethernet, IPERF, Wireshark
- **Pre-Sales & Consulting:** Solution architecture, POC leadership, RFP/RFI authoring, value-based demonstrations, discovery workshops, Visio, Lucidchart, draw.io, PowerPoint, executive presentations
- **Security:** Sophos, network security, IAM Roles, SSH, TLS, Certificates, Zero Trust framework
- **Development:** Node.js, React, JavaScript, Python, Bash, PowerShell, HTML5, CSS, MongoDB, MySQL, Postman
- **Operating Systems:** Windows Server, Linux, Mac OS, Solaris
- **Languages:** English (C2), Spanish (Native), French (B1)

RELEVANT WORK EXPERIENCE

Technical Architect | Xerox Canada Ltd.

June 2021 – February 2026 · Ottawa, Canada

- Supported 10–30 enterprise accounts annually across the Canadian Federal Government, healthcare, banking, education, municipalities, school boards, and global accounts, managing the full technical pre-sales cycle from discovery through solution delivery.
- Led 5–10 customer-facing architecture workshops and Proof of Concepts per year across public and private sectors, designing customized print and fleet management solutions for enterprise accounts typically valued at \$500K USD and above, ranging from 25 to 1,000+ device deployments. Contributed to solution pricing and proposal development alongside sales teams.
- Authored technical content for 1–10 RFP/RFI responses annually, targeting the Government of Canada and enterprise procurement, contributing to successful outcomes on the majority of submitted bids. Created supporting reference documentation and solution architectures, leveraging an active Secret-level security clearance (Level II, valid to 2034).
- Engaged C-level executives, Directors, and technical managers through formal presentations and discovery sessions across 100+ enterprise engagements, articulating complex solutions at both strategic and technical levels. Successfully influenced hesitant clients through tailored POCs, including converting an undecided account by demonstrating clear solution superiority — resulting in a signed contract.
- Collaborated with multiple account executives across Canada, North America, and global accounts on pre-sales strategy, solution pricing, and client presentations, serving as the technical anchor across a broad regional territory to support pipeline development and improve win rates.

Solution Engineer / Pre-Sales Engineer | FileCatalyst by HelpSystems

May 2019 – June 2021 · Ottawa, Canada

- Designed and delivered customized pre-sales solutions for media and broadcast enterprise clients, managing POCs and technical engagements, including a single account valued at \$700K post-contract.
- Presented and demonstrated FileCatalyst's file transfer technology at international trade shows, including IBC and NAB, representing the company to channel partners and joint end-users in front of global audiences.
- Supported channel partners in evaluating and responding to RFPs and RFIs, providing formal proposals, architecture diagrams, and technical guidance through briefings, POCs, and Architectural Design Sessions.
- Systematically tracked product deficiencies and customer feedback, advocating internally with product management to align development priorities with market needs.

Senior Network Engineer & Project Manager | UFINET

Apr 2015 – Jul 2016 · Tegucigalpa, Honduras

- Technically led 3 cross-functional teams of 5 members each, overseeing the monitoring and management of 750+ km of multi-city fiber optic infrastructure interconnecting North, Central, and South America.
- Led end-to-end delivery of a national fiber expansion project, increasing the country's fiber optic capacity by 30% through the installation of 5 new nodes with provisioning, dark fiber, and internet capabilities — completed within 18 months.
- Defined network strategy and contributed to designing a redundant fiber optic ring, standardizing site surveying, configuration, and customer handover processes for new node deployments.
- Prepared regulatory documentation to renew operating permissions with the government's telecommunications regulatory body.

Datacom Engineer | Huawei Technologies

Aug 2010 – Mar 2014 · Tegucigalpa, Honduras

- Technically supervised 20 field technicians in the installation and configuration of 700+ Huawei switches, merging voice and data network infrastructure for the IPRAN network across access and aggregation layers in Honduras.
- Played a key role in bringing VoIP infrastructure to Honduras through the IPRAN deployment, a landmark telecommunications project for the country.
- Managed separate in-person network deployments across two countries — Honduras and Costa Rica — configuring access layer IP transmission equipment for UMTS networks for Telefonica.
- Administered network management system platforms on Solaris 10 with High Availability on Oracle SPARC servers, covering commissioning, monitoring, maintenance, and upgrades.

OTHER EXPERIENCE

Technical Support Engineer L1 | Sophos

Aug 2018 – Mar 2019 · Ottawa, Canada

- Provided technical support for Sophos firewall products across SMB and enterprise clients, resolving complex network, OS, and configuration issues via remote sessions.

Customer Service Support Agent | SonicWall

Jun 2017 – Mar 2018 · Ottawa, Canada

- Provided technical support for SonicWall network security products, building foundational knowledge in enterprise cybersecurity solutions.

EDUCATION

MEng. in Electrical and Computer Engineering — University of Ottawa · Ottawa, Canada · 2016–2018

BSc. Telecommunications Engineering — UNITEC · Tegucigalpa, Honduras · 2006–2010
